Continuation of 11. does NOT place the application in condition for allowance because: of the reason set forth in the Final Office Action; the language "wherein the copolymer is produced by a pearl polymerization method" is related to process of forming a copolymer, and fails to further differentiate the copolymer taught in the applied prior art vs that claimed in the present claimed invention. The applicants'argument is not persuasive since it is addressed to the process of making the polymer rather than claimed material. or the process of making the material. Therefore, it is believed that the rejection set forth in the previous office action is proper and should be maintained.
